04/2017 - 04/2018,   *Mauranipur*

Courses
- Science

PERSONAL PROJECTS

Go-Grocery [e-Commerce] (04/2023 - Present)
- I'm developing a personal e-commerce website using React for the frontend. It's still in progress, with local storage for backend connection. Frontend almost done, focusing on backend next.
- Link: https://github.com/nerdnightboy/go-grocery

Personal Portfolio (03/2023 - 03/2023)
- I created a portfolio website with HTML, CSS, and JavaScript. It's a frontend project with recent updates and design improvements. No backend integration.
- Link: https://github.com/nerdnightboy/personal-portfolio

AI Image Generator (04/2023 - 04/2023)
- I built an AI image generator using React+Vite, inspired by the JS Mastery YouTube channel. Utilized OpenAI API for generating images from words. It was an exploratory project for learning purposes.

WORK EXPERIENCE

Frasher
Results-driven individual with expertise in React, C++, Python, and Java. Skilled in developing user-friendly web applications and implementing efficient algorithms. Although lacking professional experience, I have honed my practical skills through independent projects. Detail-oriented and problem-solving mindset, collaborating effectively within cross-functional teams. Proficient in SQL for data management and integration. Committed to enhancing technical abilities and contributing to organizational success through strong work ethic and adaptability. Seeking opportunities to expand software development knowledge.
